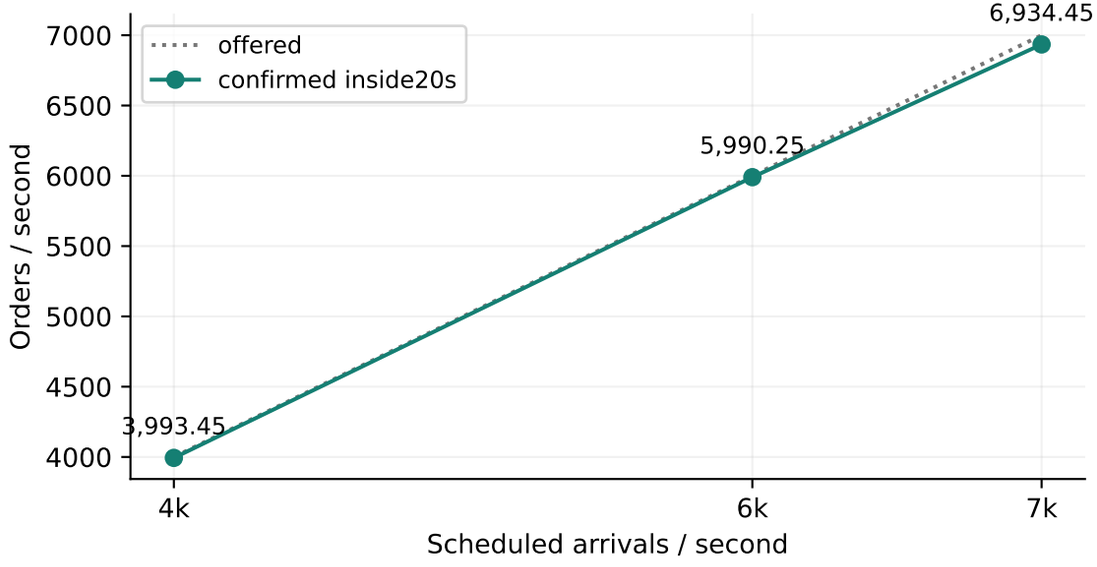
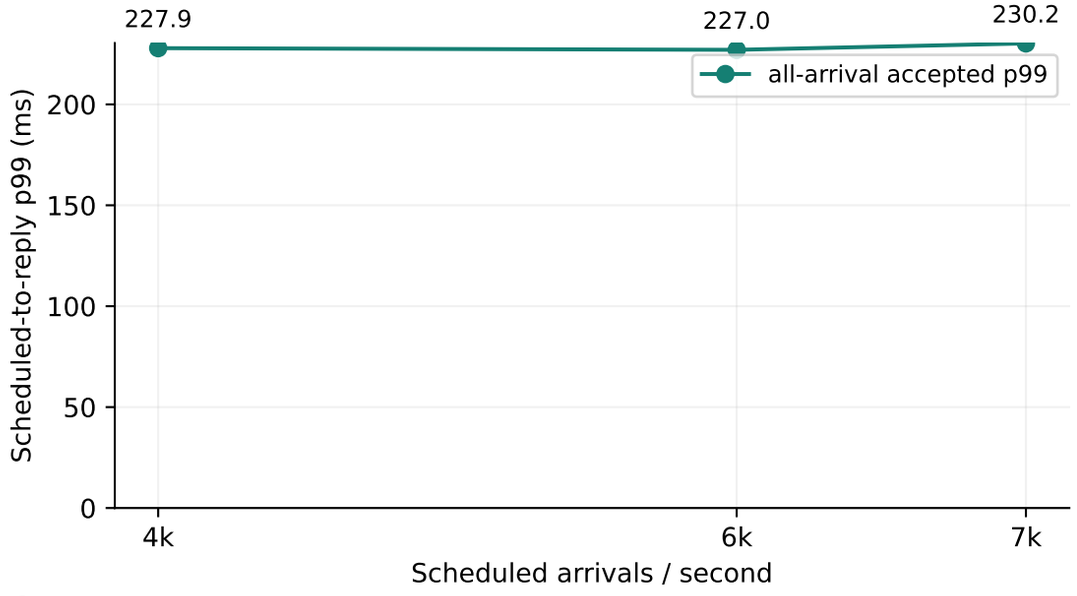
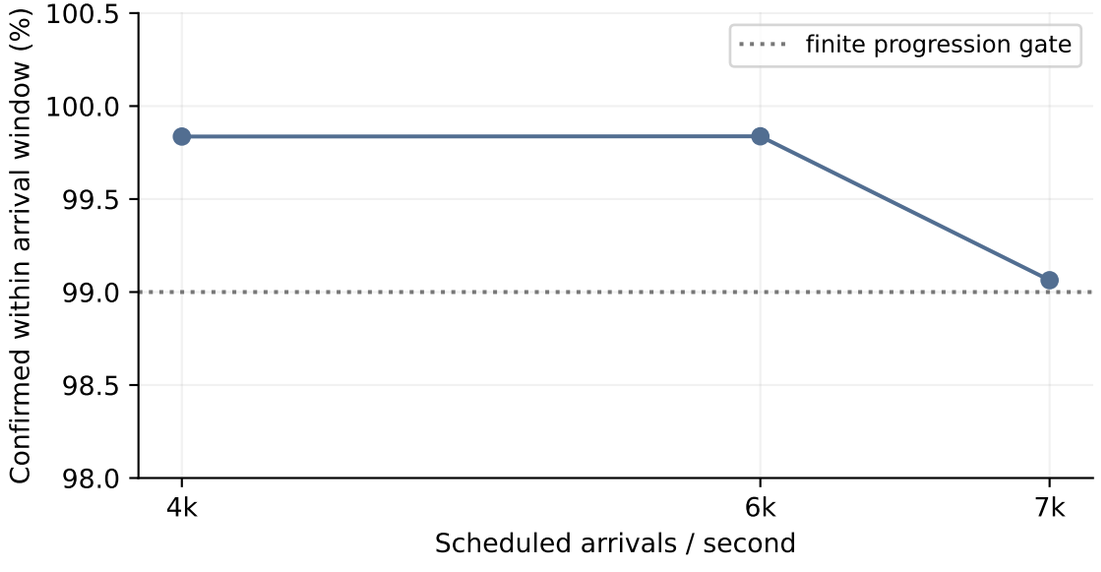
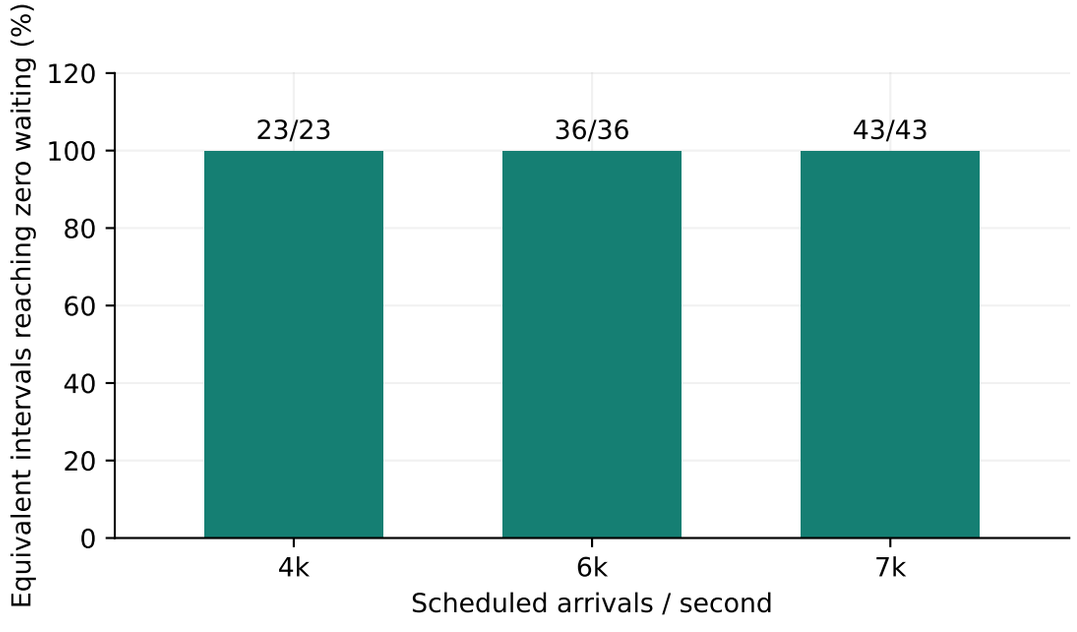
VectorMatch: rotating dispatch, fine maintained capacity curve









One fresh20s lineage per point;source566dd2fa/code2b8d7594,leader0,sync2,read128/page32,batch4,W128/Q64.
One CPU host / three JVMs / loopback UDP / one physical session. Recorded waiting is not exact physical queue occupancy.
Finite gates and within-window recovery are not sustained capacity,statistical significance,hard realtime or100M proof. Hollow tails exclude missing arrivals.
